Signature Scents

Imagine the aroma of neroli blossoms, vetiver roots or yuzu fruit wafting in the air as you enter a space... the joy, the pleasure, the memories of the moment sealed through scent, the oldest of human senses.

Our sense of smell is primal, connecting to memory, mood and pleasure. Having your own signature scent is a unique and highly impactful way to commemorate your wedding day or special event, to brand your company/office space or to offer customized healing blends to your customers.

Whether you're a healing practitioner wanting a proprietary scent for your massage oil, a wedding planner wanting a special touch for your next wedding, or an HR manager wanting to bring greater wellness and productivity to your workplace, we can design an aromatic that hits the mark.

We absolutely love both of the scents you designed for us!
To match our Steampunk theme, we chose “*Bergamot Rain*,”
with essential oils inspired by that time period. We are so excited to
experience our very own Twin Flame aroma during our magical weekend!
